Professional Summary

Aspiring Junior Web Developer with 3+ years of experience creating responsive, user-focused web applications using modern technologies. Proficient in Laravel (PHP), React, JavaScript (ES6), Django, Flask (Python), MySQL, and Git, with a strong foundation in full-stack development. Highly motivated to contribute, learn, and grow in a professional environment, with a strong interest in advanced web technologies and AI.

Projects

Disease Prediction System

- Developed a system to predict diseases from symptoms using machine learning.
- Handled data preprocessing, model training, and evaluation.
- Technologies: Python, Pandas, NumPy, Flask.

Learning Management System (LMS)

- Built a web-based LMS to manage courses, users, and content.
- Developed responsive UI with React and backend APIs with Laravel, integrated with MySQL.
- Features: user authentication, course enrollment, progress tracking.

Real Estate Property Management System

- Created a web app to manage properties, clients, and transactions.
- Built frontend with React and backend with Laravel, integrated with MySQL.
- Features: property listings, client management, booking, payment tracking.

Experience

Junior Web Developer – MAC Planners & Builders Ltd

January 2023 – Present

- Developed, tested, and maintained full-stack web applications using Python, PHP, React, MySQL, and JavaScript ES6.
- Implemented responsive UI/UX designs with Bootstrap and Tailwind CSS, ensuring cross-device compatibility.
- Collaborated with product managers, designers, and QA teams to deliver projects on time and meet client requirements.
- Optimized application performance, debugged issues, and maintained clean, modular, and scalable code.
- Integrated RESTful APIs and third-party services to enhance application functionality.

MAC Web Development Internship – MAC Planners & Builders Ltd

February 2022- December 2022

I worked as a paid, full-time, on-site professional intern, responsible for website maintenance, managing property listings, assisting in front-end development, supporting back-end tasks like data management and form handling, fixing minor bugs, and reporting progress to supervisors while working with Laravel and databases.
